

Support **Grid Resiliency** Education & Research

BetterGrids Foundation

BetterGrids is a public charity (501 (c) (3)) dedicated to grid education and research. Our vision is for grid researchers to have the essential test data they need to develop better grid solutions. Our mission is to operate the Grid Data Repository in a self-funding manner to support education and research in developing better solutions for grid resiliency, control, and optimization.

We need your support!

BetterGrids, an organization with no employees, operates entirely through efforts and contributions from individuals and organizations. Over 70 organizations, including ARPA-E, have contributed to the creation of our Grid Data Repository, which provides free access to 200 grid models to researchers world-wide. We need donations to:

Make grants to students to perform grid resiliency research:

- Donor could act as sponsor, further specifying and guiding the research.

Provide internships for students:

- As data curators or admin/outreach support.

Grid Data Repository

Find public grid models

Publish your innovations

Collaborate with others

Why donate?

Support a worthy cause:

- Grid Data Repository
- Resiliency R&D
- Student education & training

Leverage your R&D funds:

- Ability to sponsor specific resiliency research topic for students
- Ability to guide their research and benefit from the interim results

Engage & network with community:

- Donors can choose to join the BetterGrids Grant Committee, and participate in various outreach activities

Gain publicity:

- Acknowledgement on BetterGrids website, newsletters, and other publications
- Donor's name can be attached to the specific grant it sponsors

Donations are tax deductible.

How much to give?

We take any amount (e.g., \$100, \$1000, \$10,000, \$100,000). If you wish to sponsor a specific student grant in your name, we suggest a donation of \$10,000 or more.
